Handy mitt

A handy microfibre mitt designed for the professional market.

The Handy mitt's microfibre technology effectively picks up dust and dirt, while the conventional mitt style helps the user to quickly clean around hard to reach or shaped surfaces.

Made with an elasticated cuff for comfort and ease of use, the double-sided construction means it can be worn on either hand and used on both sides, which makes it perfect for cleaning around or under objects such as panels, beds and furniture. It is also machine washable.

No chemicals are required. Just use a little water for cleaning.

Key features & benefits

Microfibre
Cleaning

No chemicals
required

Use dry
or damp

Washable

- No chemicals required.
- Made from microfibre with a polyester lining.
- Elasticated cuff for comfort and ease of use.
