Hi-absorb microfibre cloth

Multipurpose, highly absorbent microfibre cloth with the added benefits of PUR coating.

Hi-absorb is a heavyweight microfibre cloth made from a knitted blend of polyester and polyamide yarns, which are coated with polyurethane (PUR) to give it a soft and strong chamois-like feel. This means the fabric is effective at surface cleaning and is especially suited to high gloss surfaces requiring a streak-free finish such as mirrors and metals.

The polyurethane coating applied to Robert Scott's Hi-absorb cloth provides better durability and higher absorbency properties. When rinsed, Hi-absorb also releases more dirt particles than standard cloths, reducing the chance of wiping on dirt or scratching high gloss finishes with trapped dirt. It also lasts longer and is low-lint, all with the exceptional cleaning power of microfibre.

Key features & benefits

Microfibre Cleaning

Highly absorbent

PUR Long-lasting

Washable up to

- Multipurpose, highly absorbent and rinseable.
- Microfibre cleaning.
- Long lasting due to the PUR treatment.
- Washable up to 95°.
- Hygiene colour coded.

Best use

The outstanding rinse results of this cloth makes it an obvious choice for both large scale commercial and domestics cleaning.

Applications

The polyurethane-coated fabric is great at cleaning most surfaces as well as high gloss finishes such as mirrors and chrome. Use damp for best results.

Washing instructions

Do not use fabric conditioner.

Material

Made from a heavyweight knitted blend of polyester and polyamide yarns, and coated with polyurethane.
